

FRESH AIR PERSONAL

ANYWHERE, EVERYWHERE

In today's modern environment, indoor environments are rife with contaminants. The FreshAir Personal provides nature's own powerful properties with a built-in ionizer that attracts free-roaming particles and captures them, reducing pollutants that invade the space within which you breathe. The FreshAir Personal creates an almost particle-free zone around the wearer by generating high intensity ion streams that add charges to nearby airborne particles. These charged particles repel each other and adhere to surfaces out of your breathing zone. This means decreased concentrations of smoke, dust, and pollen in the air you breathe. The FreshAir Personal is designed and engineered to be so simple to use that it encourages daily usage, like wearing a watch.

- Removes airborne contaminants from the air immediately around your body
- Freshens air and removes odors within your breathing zone
